SUMMARY

Software Engineer, Machine Learning Engineer, and IT Consultant with expertise in Django REST Framework, React.js, Next.js, PostgreSQL, and DevOps. Experienced in building scalable web and mobile applications, developing secure and high-performance backend systems, and implementing digital marketing strategies. Passionate about leveraging technology to solve real-world problems, optimize business processes, and enhance user experiences.

SKILLS

Programming Languages

Python | JavaScript | SQL

Backend Development

Django & Django REST Framework (DRF) | FastAPI | PostgreSQL | MySQL | RESTful API Development | Authentication & Authorization (JWT, OAuth2) | Caching & Performance Optimization

Frontend Development

ReactJS | Next.JS | React Native | Tailwind CSS | Material UI | Bootstrap

DevOps & Deployment

Docker & Containerization | CI/CD Pipelines (GitHub Actions, Railway, Render) | Cloud Platforms (Google Cloud, Vercel, Railway) | Expo Application Services

Additional Skills

IT Technical Support & Networking | Digital Marketing (SEO, Content Creation, Social Media) | Web Security & Best Practices | Payment Integrations (M-Pesa, Pesapal, Mastercard) | Business Development & CRM

PROFESSIONAL EXPERIENCE

Nafsi Reset

Chief Technology Officer

November 2024 - June 2025

- Spearheaded digital marketing strategies to increase brand visibility and client engagement.
- Managed the organization's website and booking system, streamlining client registrations and online therapy sessions.
- Provided IT support for smooth communication, online meetings, and secure data handling.
- Designed marketing campaigns, leveraging SEO, social media, and content creation to drive online traffic.
- Ensured compliance with data protection policies, safeguarding client confidentiality.
- Assisted in setting up and managing Google My Business, social media pages, and email marketing campaigns.
- Developed a Next.js website for therapy services.

LegioConnect Application

Software Engineer - Contract

July 2024 - February 2025

- Built a mobile application using React Native and Expo, delivering a seamless and intuitive user experience.
- Designed and implemented a robust backend API using Django REST Framework, enabling efficient data communication.
- Deployed the API to Railway, ensuring reliable and scalable backend operations.
- Published the application to the Google Play Store, currently in Closed Testing, to streamline user feedback and iterative improvements.
- Developed a feature-rich admin panel using Next.js, providing comprehensive management capabilities for administrators.
- Deployed the web application to Vercel and configured DNS settings for the custom domain www.legioconnect.com, ensuring high availability and user accessibility.

Learn with Mr.PC

Software Engineer - Contract

September 2024 - January 2025

- Developed the frontend using Next.js, creating an intuitive and responsive interface for showcasing courses.
- Built the API using Django REST Framework (DRF), enabling dynamic course loading and course booking functionalities.
- Deployed the API to Railway, ensuring reliable and scalable backend operations.
- Implemented mailing notifications for course bookings, enhancing user engagement and communication.
- Created a comprehensive admin panel for managing courses and booking data, enabling the admin to track course bookings and communicate with clients.

Studio Nomak

Software Engineer - Contract

April 2023 - January 2025

- Engineered a highly efficient API using Django REST Framework, optimizing data handling and reducing latency.
- Deployed the API to Railway, ensuring smooth and scalable service delivery.
- Built a responsive and user-friendly frontend using Next.js, enhancing customer interaction and satisfaction.

Close The Gap - Circular Economy Hub

IT Support & Network Technician - Internship

June 2023 - September 2023

- Provided technical support for IT infrastructure.
- Installed and maintained Windows & Linux operating systems.
- Configured network infrastructures for secure connectivity.
- Assisted in deploying IT equipment to schools and businesses.

PROJECTS

Tamarind Management Limited Feedback System

May 2025 - Present

- Built a feedback system using NextJS and Django REST framework.
- Improve analytics and feedback collection
- Implement semantical analysis

Payment Gateway

January 2025

- Built a payment gateway API supporting M-Pesa and card payments.
- Integrated the API to Duka e-commerce application.

Corban Technologies LTD

Founder

January 2025

- Enterprise Support Solutions: brand identity creation, digital marketing, and business setup. Boost your online presence with expert digital marketing and SEO strategies.
- Web Development: UI/UX design, business analysis, and development of POCs, MVPs, and enterprise-grade applications
- Mobile App Development: building cutting-edge mobile apps for any platform following full-cycle development.
- Cybersecurity & Networking Solutions: network setup, CCTV installations, system hardening and continuous network monitoring to protect against threats and ensure operational reliability.
- Cloud Solutions: providing scalable, secure, and efficient cloud infrastructure to drive your business forward.
- Machine Learning & Artificial Intelligence: harnessing AI and ML to optimize your business with advanced data analysis, custom model development, and seamless implementation.

EDUCATION

Bachelor of Science in Computer Science

South Eastern Kenya University (August 2020 - April 2024)

CERTIFICATIONS & TRAINING

- Networking Essentials - Cisco NetAcad
- Google Hustle Academy - HubSpot Academy
- Python Programming - Kaggle
- Executive Diploma in Finance Management - Udemy
- Web Development: HTML, CSS, and JavaScript - Udemy
